Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Part III DETAILED ACTION

Examiner of record has been changed. Please address further correspondence to Examiner Michael Borin, AU 1631.

Amendment filed 02/24/2005 is acknowledged. Claims 1-4,11-13,21,57-59, 62,63 are pending.

Upon review of the pending claims the following restriction requirement is deemed necessary.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4,11,12,21,62,63, drawn to method of detecting a target molecule, classified in class 435, subclasses 6 and 7.1.
- II. Claims 57-59, drawn to method of testing a sample for presence of nucleic acids, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and IV are related as patentably distinct because they are directed to methods which have different modes of operation and different steps. The method of Group II requires treating test sites in the presence of the sample to extend

Art Unit: 1631

oligonucleotide probes to include a detector agent. Contrary, the method of Group I utilizes sensors covalently coupled to redox active moieties. The methods require applying different prior art and have different enablement requirements.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h). Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel, Ph.D., can be reached on (571) 272-0718. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
